SUMMARY

Motivated Data Science undergraduate at Sri Lanka Institute of Information Technology (SLIIT) with a strong foundation in data analysis, statistics, and programming. Experienced in applying data-driven approaches through academic and personal projects. Passionate about transforming data into actionable insights and solving real-world problems. Seeking a Data science related internship to further develop technical expertise while contributing to innovative, data-driven solutions.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT) | 2023 - Present

BSc (Hons) in Information Technology - Specializing in Data Science | CGPA: 3.76

D.S.Senanayake College, Colombo 07 | 2019 - 2022

G.C.E Advanced Level (Physical Sciences) | Physics: C, Combined Mathematics: C, Chemistry: S

Asoka College, Colombo 10 | 2013 - 2018

G.C.E Ordinary Level | 9 A passes

PROJECTS EXPERIENCE

Data Warehousing & Business Intelligence Project | Individual Project | Feb 2026 - May 2026

- Designed a 6-dimension star schema data warehouse on the Online Shop 2024 dataset (Kaggle) with SCD Type 2 on customer dimension, and developed 3 SSIS packages integrating 3 heterogeneous sources (SQL Server, Excel, CSV) with surrogate key resolution and accumulating snapshot fact table
- Built and deployed an SSAS multidimensional cube with Date Hierarchy enabling OLAP operations in Excel, and published interactive Power BI reports to Power BI Service using SQL Server, SSIS, SSAS, Power BI, T-SQL and DAX

Student Performance Data Analysis | Group Project | Feb 2026 - May 2026

- Conducted descriptive analysis (distributions, summary stats) and inferential analysis (Pearson correlation, ANOVA, T-tests) on a 6,607-student Kaggle dataset using R
- Applied predictive modelling via Multiple Linear Regression with a 70/30 train-test split, achieving $R^2 \approx 77\%$, identifying study hours and prior performance as dominant predictors of exam scores

Smart Campus Operations Hub | Group Project | Feb 2026 - May 2026

- Contributed to Smart Campus Operations Hub, a full-stack university management platform built with Spring Boot and React, covering facility bookings, maintenance incidents, notifications, and role-based access control
- Developed the Maintenance & Incident Ticketing module, implementing full ticket lifecycle with role-based access (users, technicians, and admins) and built REST APIs supporting image attachments via Cloudinary, technician assignment, comment system with ownership rules, status/priority/category filtering, and notification triggers; developed React frontend with ticket creation, live progress stepper, and role-specific dashboards

HabitX - Habit Tracking Android App | Individual Project | Sep 2025 - Oct 2025

- Developed an Android habit-tracking application using Kotlin and Material Design 3, featuring habit tracking with circular progress indicators, mood journaling with line chart visualisation, and a water intake tracker with customisable reminder intervals powered by WorkManager

CocoSmart - Coconut Plantation Management System | Group Project | Jul 2025 - Oct 2025

- Contributed to a full-stack MERN plantation management system built as a client-based undergraduate project, covering marketplace, finance, authentication, and HR & workforce management modules
- Developed the Labor Management and Task Assignment Modules, implemented REST APIs for worker registration with age/NIC validation, task lifecycle management, multi-worker assignment, and real-time availability tracking; built React frontend with HR dashboard, workforce analytics, and worker-facing task management interface

Online Banking System | Group Project | Feb 2025 - May 2025

- Contributed to a Java web-based online banking system built with Servlets, JSP, and MySQL covering user management, accounts, fund transfers, bill payments, and offers
- Developed the Transactions module, implemented fund transfer CRUD operations and a scheduled transactions feature with date/time support, following MVC architecture with JDBC for database connectivity

Online Job Portal | Group Project | Aug 2024 - Nov 2024

- Led a 5-member team to build a PHP and MySQL web-based job portal supporting job seeker, employer, and admin roles, covering job listings, applications, user management, and an admin dashboard for managing users, job postings, and contact messages

SKILLS

Programming Languages: Python, C, C++, Java, JavaScript, Kotlin, PHP, R

Web: HTML, CSS

Mobile: Kotlin, Android, XML, Material Design

Frameworks & Libraries: React, Tailwind CSS, Node.js, Express.js, Spring Boot, Flyway

Tools: VS Code, Dev-C++, Eclipse, RStudio, Postman, IDLE(Python), GitHub, IntelliJ IDEA, Maven, Docker, Cloud Fundamentals

Databases: MySQL, MongoDB, Oracle

DW & BI: Data Analysis, Data Cleaning, EDA, Data Visualization, Dashboard Development, Power BI, DAX, Excel

Statistics & Analytics: Descriptive Analytics, Inferential Statistics, Predictive Modelling, Multiple Linear Regression, ANOVA, Hypothesis Testing

Core Competencies: Problem Solving, Communication, Leadership Skills, Team Collaboration, Willingness to Learn

CERTIFICATIONS

AI/ML Engineer - Stage 1 - SLIIT

Introduction to Data Science - Cisco

Python for Beginners - University of Moratuwa

MongoDB Data Modeling Path - MongoDB

MongoDB Atlas Administrator Path - MongoDB

AWS Cloud Practitioner Essentials - AWS

Diploma in Information Technology - ESOFIT

Oracle Java Foundations - Oracle
