SUMMARY

Software Engineering undergraduate at Sri Lanka Institute of Information Technology (SLIIT) with hands-on experience in full-stack and mobile application development. Skilled in Spring Boot, MERN Stack, Next.js, Java, PHP, C++, R, and SQL, with a strong foundation in software engineering principles, web development, database design, and RESTful APIs. Experienced in both frontend and backend development through academic and personal projects. Passionate about building efficient, user-focused software solutions and continuously learning new technologies.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT) | 2023-Present

BSc (Hons) in Information Technology - Specializing in Software Engineering | CGPA: 3.23

British Way English Academy | 2019

Diploma in English Language | B+

LPEC Campus | Present

Diploma In Human Recourse Management

Pushpadhana Girls' Collage, Kandy | 2019-2021

G.C.E Advanced Level (Engineering Technology) | Science for Technology: B, Engineering Technology: C, IT: C

Hemamali Girls' Collage, Kandy | 2013-2018

G.C.E Ordinary Level | 5 A passes, 3 B passes, 1 C pass

PROJECTS EXPERIENCE

CeylonBrew - Online Tea Management System | 2025

- Developed and implemented full-stack functionalities using Spring Boot, React, MySQL, and Tailwind CSS, including an issue tracking module with image upload, storage, and retrieval capabilities through Cloudinary API integration.
- Engineered waste calculation and analytics features while automating PDF report generation for operational data, improving monitoring, reporting efficiency, and decision-making within the tea manufacturing process.

ELIXRA - Online Smart Health Care Platform | 2026

- Developed and deployed payment and patient management services using Spring Boot, MySQL, and Microservices Architecture, enabling modular, scalable, and maintainable healthcare system operations.
- Designed and implemented a scalable frontend architecture using React, promoting component reusability, modular development, and seamless integration with distributed backend services.

RebuildHub - Crowdsourced Damage Assessment Platform | 2026

- Developed resource and inventory management functionalities using Node.js, Express.js, React, and MongoDB, enabling efficient tracking, allocation, and management of disaster relief resources.
- Implemented secure payment processing through Stripe integration and enhanced application security using JWT-based authentication and authorization mechanisms.

ETicketsBus - Online Bus Ticket Booking System | 2024

- Developed route management functionalities using Java Servlets and MySQL, enabling efficient creation, updating, and management of bus routes within the system.
- Designed and integrated backend services with a MySQL database to ensure reliable data storage, retrieval, and smooth ticket booking operations.

OnlineJobs.lk - Job Portal | 2024

- Developed a web-based job portal using PHP, HTML, CSS, and MySQL, featuring job listing functionality and an employer dashboard for managing job postings.
- Implemented core backend and database functionalities to support user interactions, data management, and dynamic job listing operations.

Shaini Jayakody - Personal Portfolio | 2026

- Developed a fully responsive personal portfolio using React, TypeScript, and Tailwind CSS, featuring dynamic project filtering (category and tech stack), reusable components, and scalable frontend architecture with custom hooks.
- Designed and implemented interactive UI/UX features including animated project cards with expandable details, Framer Motion animations,theme-aware navigation,constellation-style loader, Cloudinary integration.

StellaRise - Android Wellness App | 2025

- Developed a wellness Android application using Kotlin and Material Design 3, featuring habit tracking, step-by-step completion guides, and a custom star rating system with scheduled reminders via AlarmManager and WorkManager.
- Built interactive features including an emoji mood journal, custom Canvas API charts, star-shaped hydration tracker, and home screen widget, with local data persistence using SharedPreferences, Gson, and MVVM architecture.

Coffee Chapter - Coffee Shop Mobile Application UI/UX Design | 2025

- Developed a multi-screen coffee ordering Android application using Kotlin, Android SDK, and XML layouts, featuring onboarding flow, item browsing, and cart functionality.
- Designed and implemented a vintage-themed UI with drink customization options (cup size, art, and flavor selection) and edge-to-edge responsive layouts using ConstraintLayout and Material Design principles

SKILLS

Languages: Python, Java, JavaScript, TypeScript, Kotlin, PHP, C, C++, R

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot

Mobile: Android Development (Kotlin, XML, Android SDK, Material Design)

Databases: MySQL, MongoDB, SQLite

Tools & Platforms: Git, GitHub,Docker,Kubernetes,Postman, Maven,Android Studio,IntelliJ IDEA,VS Code,Eclipse, Figma,Selenium,Cypress

Cloud & Services: Cloud Computing Fundamentals, Cloudinary, Stripe

Concepts: RESTful APIs, JWT Authentication, Microservices, Object-Oriented Programming (OOP)

Core Competencies: Problem Solving, Communication, Leadership Skills, Team Collaboration, Willingness to Learn

CERTIFICATIONS

Python for Beginners - University of Moratuwa

Python Programming- University of Moratuwa

Web Design for Beginners- University of Moratuwa

Introduction to Python- Sololearn

Python Developer- Sololearn

Building GenAI Apps Learning Badge Path- MongoDB

Deploying and Evaluating GenAI Apps Learning Badge Path- MongoDB

MongoDB Atlas Administration Path- MongoDB

WBD MongoDB Atlas Administrator Path- MongoDB
